<b>Office Action Summary</b>	Application No. 10/663,135	Applicant(s) CAHILL, RICHARD A.	
	Examiner Mohammad Z. Shaikh	Art Unit 3609	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3609

Application/ Control Number: 10/663135

Art Unit: 3609

***Detailed Action***

***Claimed Objections***

1. The unnumbered claim does not meet the requirements of rule 1.126 and has been renumbered. The claims should also start on a new sheet of paper.

***Claim Rejections- 35 USC § 101***

The following is a quotation of the appropriate paragraphs of 35 U.S.C 101 that forms the basis for the rejections made in this Office Action:

*Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefore, subject to the conditions and requirements of this title.*

2. The claimed invention is not supported by either an asserted utility or a well established utility. Applicant in paragraph (2) talks about the process may include the agreement of the heir/heirs as well as the individual or married couple who anticipates being their benefactors to said process.... they have legal recourse should the individual, partnership or business entity that they have contracted with to settle the estate in question fail to perform according to the terms of said agreement. Legal

Art Unit: 3609

recourse is a fundamental right in our society. The right to sue is afforded to all citizens.

Applicant may not claim this right as his invention.

***Claim Objections 35 U.S.C §112***

The following is a quotation of the appropriate paragraphs of 35 U.S.C 112 2<sup>nd</sup> paragraph that forms the basis of this Office Action:

*The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.*

4. Claim 1 is rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

The period at the end of the (a) on page of 1 of the claim makes it unclear if applicant intended to have two claims instead of one. On paragraph (2) on page 2, applicant states the process may include the agreement of the heir/heirs as well as the individual or married couple... This language is not definite, and needs to be changed.

***Claimed Rejections- 35 USC § 103***

The following is a quotation of the appropriate paragraphs of 35 U.S.C 103 that forms the basis for the rejections made in this Office Action:

*(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.*

3. Claim 1 is rejected under 35 U.S.C 103(a) as being unpatentable over US Patent number 6,430,542 to Moran (herein referred to as Moran) in view of US Patent number 5,864,685 to Hagan (herein referred to as Hagan).

Moran teaches a method of transferring assets from deceased persons to their beneficiaries, a pre-agreed settlement plan (col 3, lines 3-9). Moran also teaches any contract/contracts between any individual or married couple anticipating his/her/their demise and any individual, partnership or business entity capable of transferring and/or assisting in the transfer of said individual or married couple's estate after that demise, so that it becomes the legal property of said individual or married couple's heir or heirs, according to said individual or married couple's instructions (Abstract lines, 12-16). Moran teaches the married couples instructions for a fixed sum and according to fix schedule of costs along with a pre-agreed percentage of assets to reduce the cost of transferring their estate settlement plan (Col 38, lines 5-11).

Moran does not teach the process of including a requirement for individuals or married couples to own assets in a non-probatable fashion such as trusts or joint tenancy

Art Unit: 3609

with their potential heirs. Hagan does teach this requirement for individuals or married couples to own assets in a non-probatable fashion such as trusts or joint tenancy with their potential heirs (Column 12, lines 40-44). It would have been obvious to one of ordinary skill in the art to modify the virtual executor of Moran to include the option of having trusts. Moran does not teach instructing a financial institution to maintain their accounts under a "pay on death" or "transfer on death" designation. Hagan does this requirement of instructing a financial institution to maintain their accounts under a "pay on death" or "transfer on death" designation (column 1, lines 41-42). It would have been obvious to one of ordinary skill in the art to modify Moran's invention to include a financial institution to pay on death or transfer on death.
